4. Condoms

6.

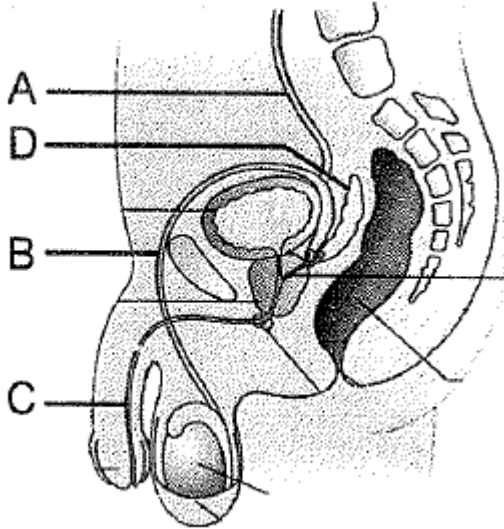

Which of the following was the first country to launch the 'National family' planning programme in 1951?

1. USA
2. UK
3. Germany
4. India

7. In periodic abstinence, the couple must avoid the coitus/sexual contact from day \_\_\_\_\_ of the menstrual cycle
  1. 14 to 21
  2. 18 to 21
  3. 14 to 15
  4. 10 to 17
  
8. "Every sixth person in the world is an Indian". Such condition can be related to
  - 1 A rapid decline in death rate
  - 2 A rapid decline in MMR & IMR
  - 3 More number of people in reproductive age
  - 4 All of these
  
9. According to WHO, reproductive health means total well being in all aspects of reproduction i.e.
  1. Physical and emotional
  2. Emotional and behavioural
  3. Behavioural and social
  4. All of these
  
10. Following are the reasons behind explosive growth of population except
  1. Decline in maternal mortality rate
  2. Decline in infant mortality rate
  3. Decline in number of people in reproductive age group
  4. Decline in death rate
  
11. The technique which uses amniotic fluid for detection of prenatal disorders is
  1. Laparoscopy
  2. Endoscopy
  3. Amniocentesis
  4. Ultrasound sonography
  
12. Which of the following are not used for the synthesis of contraceptive pills?
  1. Progestogens only
  2. Progestogens and estrogen combination
  3. Estrogen only
  4. More than one correct
  
13. Which of the following will not result in the control of population growth?
  1. Larger use of contraceptive methods
  2. Raising of marriageable age
  3. Promotion of interracial marriages
  4. Promotion of one child norm
  
14. Contraceptive pills are highly effective because
  - a. They inhibit ovulation
  - b. They inhibit implantation
  - c. They alter the quality of cervical mucus to slow down the entry of sperms
  - d. They induce follicular atresia
  1. a & b
  2. a only
  3. a,b, & c
  4. a,b,c, & d

15.

Following is a diagrammatic representation of male reproductive tract

Which of the following labelled structure is removed or tied up through a small incision on the scrotum in case of surgical method of contraception in males

1. A
2. B
3. C
4. D

16.

Common brand of male contraceptive provided by family welfare services is

1. Gossypol
2. Nirodh
3. Saheli
4. Norgynon

17.

Which of the following applications can be used to avoid possible pregnancy within 72 hours of coitus due to rape or casual unprotected intercourse ?

- a. Progestogens
  - b. Progestogen-estrogen combination
  - c. IUD
  - d. i-pills
1. a, b, c, d
  2. b, d
  3. a, b, d
  4. d only

18.

Which of the following complication is/are not related with STDs?

- a. Pelvic inflammatory diseases
  - b. Still births
  - c. Ectopic pregnancies
  - d. Erythroblastosis foetalis
1. a & b
  2. a, b & c
  3. d only
  4. c & d

19.

All the following are uses of amniocentesis, but one is misuse. Which one is misuse?

1. This technique has been developen for detecting foetal abnormalities by analysing chromosomal defects
2. The centres for genetic counselling offer amniocentesis on request of women to know: will our baby be normal
3. It is done to examine the sex of the foetus leading to increasing female foeticide
4. By foetal cell karyotyping the doctors can check for any abnormalities such as 'Downs syndrome'

20.

Lactational amenorrhoea is natural method of birth control but is generally effective upto

1. 3 month after parturition
